

Turmeric[®] Golden Gel

- Aloe vera and turmeric blend

Why Turmeric[®] Golden Gel?

Turmeric Golden Gel combines **turmeric**, **boswellia oil** and **aloe vera**. Research has demonstrated the benefits of external topical turmeric use for animals. Turmeric may have positive results when used for sarcoids, Queensland itch, inflammation, skin complaints, cuts and abrasions. **Turmeric Golden Gel** may also be beneficial in deterring flies and other insects from open wounds and skin irritations. **Turmeric Golden Gel** may also assist with the treatment and prevention of Proud Flesh.

Directions for use

Apply a liberal amount to the affected area. **Turmeric Golden Gel** may be used with or without bandaging the affected area. For best results, apply daily.

Topical application. For animal use only.

Suggested product combinations

Turmeric - a unique add-to-feed powder containing three varieties of turmeric, PowerStance powdered coconut oil, ground black pepper and resveratrol. Combining both products may promote further healing

ProMune - A herbal blend which may support and boost the immune system to aid recovery

Ingredients

About the Ingredients

Aloe vera has been included for its potential binding and penetrating properties to assist in absorption of turmeric across the skin barrier, while soothing sensitive skin.

Boswellia oil has been added as it may be beneficial as an antiseptic and may help with the healing of cuts and wounds.

Testimonial

"We found that the tumericle gel seemed to quicken up the healing process, dry the wound up, take away the putrid smell and encourage hair growth etc."

Penny, 2015

"Thought I would post this as the result is amazing so far. We had a sarcoïd appear on our horses upper fore leg it became very angry after it appeared to have been knocked. After discussion decided to try the the Equitec TURMERICLE golden gel have been applying it for approx four weeks and this is it from beginning to now."

Fiona, 2017
